SOLAR PANELS

EN A total of 39,560 cutting-edge solar panels have been installed on the entire roof of the 2.2 million sq ft facility, providing an installed capacity of 21.5 MW and generating approximately 30,673 MWh of renewable energy annually. This substantial output fulfills a significant portion of the energy needs of our production plant, while concurrently facilitating a substantial reduction of carbon emissions. This environmentally conscious initiative will effectively prevent the release of over 19,000 tons of carbon into the atmosphere annually, equivalent to the amount of carbon absorbed annually by more than 900,000 mature trees.

FR PANNEAUX SOLAIRES – Un total de 39 560 panneaux solaires de dernière génération a été installé sur l'ensemble de la toiture du site de 2,2 millions de pieds carrés (210 653 m^2), offrant une capacité installée de 21,5 MW et une production annuelle d'environ 30 673 MWh d'énergie renouvelable. Cette production couvre une part significative des besoins énergétiques de notre usine, tout en contribuant à une réduction majeure des émissions de carbone. Cette initiative environnementale permettra d'éviter le rejet de plus de 19 000 tonnes de CO_2 par année, soit l'équivalent du carbone absorbé annuellement par plus de 900 000 arbres matures.

ES PANELES SOLARES – Se han instalado un total de 39 560 paneles solares de última generación en todo el techo de la instalación de 210 653 metros cuadrados, lo que proporciona una capacidad instalada de 21,5 MW y genera aproximadamente 30 673 MWh de energía renovable al año. Esta considerable producción satisface una parte importante de las necesidades energéticas de nuestra planta de producción y contribuye a una reducción sustancial de las emisiones de carbono. Esta iniciativa respetuosa con el medio ambiente evitará de forma eficaz la liberación de más de 19 000 toneladas de carbono a la atmósfera al año, lo que equivale a la cantidad de carbono absorbida anualmente por más de 900 000 árboles maduros.

TR GÜNEŞ PANELLERİ – 210.653 metre kare büyüklüğündeki tesisin çatısının tamamına toplam 39.560 adet son teknoloji güneş paneli kuruldu. 21,5 MW kurulu güce sahip bu paneller, yılda yaklaşık 30.673 MWh yenilenebilir enerji üretiyor. Bu önemli üretim, üretim tesisimizin enerji ihtiyacının önemli bir kısmını karşılarken, aynı zamanda karbon emisyonlarının önemli ölçüde azaltılmasını da sağlıyor. Bu çevreye duyarlı girişim, 900.000'den fazla olgun ağacın yılda emdiği karbon miktarına eş olan 19.000 tonun üzerindeki karbon salınımını ve karbonun atmosfere salınmasını etkili bir şekilde önlüyor.
