

ALTERED STATE by Crossville **PORCELAIN STONE FOR ALL SURFACES**

ALTERED STATE offers the look of antiqued metals, oxidized and aged from the passing of time. The appearance mimics that of hand-forged metals awash in beautiful patina, yet the porcelain body provides superior durability, strength, low maintenance and lasting style. Each color is enhanced with directional luster lines. The effect is sophisticated, industrial and urban - ideal for floors or walls in modern design schemes.
