

Edge Detail

Classic: Traditional method of producing Zellige tiles. Classic tiles exhibit all of the unique surface, edge and color variation of authentic Zellige. Tiles are cut after the glaze firing creating thin, straight edges that allow for butt-joint installation, or installation without grout joints between the tiles.

Nouveau: Tiles are not cut after they are glazed. Nouveau tiles retain the natural edge from the mold which imparts a more “typical” tile look, while keeping the color variation, movement, and other natural, hand-crafted characteristics that people love in Zellige tiles. Nouveau tiles are easier to install, and finished installations will avoid some of the lippage associated with Classic Zellige.
