plank
from UnitedTile

Casablanca

is new to our Plank collection and features 10 elegant designer colors in 7” wide planks, and 3-1/2”x17-1/2” wide planks that can create twelve different patterns. These planks all have natural vibrant wood characters in European Oak, American Walnut and Hickory.

Kenya Hickory

This beautiful collection takes innovation to new heights. Real solid wood materials with formaldehyde-free adhesives create a naturally green product that is leaps ahead of others currently on the market. The uniqueness lies in the patented Hybrid Solid technology. A thick sawn 4mm hardwood layer is fused with a pine wood foundation and reinforced by cross grain fillets and structural edge beams for superior dimensional stability. This means that your flooring will withstand the test of time, maintaining its integrity and beauty.

Bora Oak

7" x up to 84"

Crafted with a light wire brushed texture, European Oak features wide planks in subdued tones that highlight the beauty of a long, vertical cathedral grain.

Cairo Oak

7" x up to 84"

Bora and Cairo Oaks are also available in Plus, a Select and Better grade for those who want a more refined, contemporary feel.

Citadel Oak

7" x up to 84"

HEALTH & SAFETY
100% natural solid wood engineered with formaldehyde free adhesives and zero VOC materials to be the best eco-friendly green product.

Cleopatra Oak

3-1/2"x17-1/2" Herringbone

Eden Oak

7" x up to 84"

Lagoon Oak

7" x up to 84"

STABILITY

Optimal dimensional stability is achieved with a revolutionary interlocking construction of cross grain fillets and structural edge beams, then finished with an "Anti-Moisture" sealer process, providing moisture protection.

Nile Oak

7" x up to 84"

SURFACE AND STYLE
Smoked and fumed, lightly wire brushed and textured. Finished with an anti-scratch & anti-abrasive technology.

*Coordinates with Nile Oak

Pharaoh Oak

3-1/2"x17-1/2" Herringbone

Kenya Hickory

7" x up to 84"

A lightly hand scraped texture enhances the natural beauty of American Hickory, offering a unique coloration that can only be found in a hickory species.

7" x up to 84"

DURABILITY
Eleven layers of durable coatings, composed of modified UV urethane, provide maximum protection against daily wear and tear, giving a natural oil appearance, and eliminating the need for additional oiling.

Morocco Walnut

3-1/2"x17-1/2" Herringbone

A natural American walnut hybrid solid engineered hardwood with a light, hand scraped texture. A truly sophisticated and timeless beauty in a rich, deep finish.

*Coordinates with Safari Walnut

Safari Walnut

7" x up to 84"

WEARABILITY
4mm thick solid hardwood wear layer allows for re-sanding and refinishing over time.
