

ALTER/EGO

BY PROVENZA

Two contemporary and elegant concepts inspired by nature and brought together in an innovative architectural vision. **ALTER** is influenced by the versatile charm of oak, processed and enriched with textural, timeworn details coupled with subtle touches of tone-on-tone stucco. **EGO**, the embodiment of Central American sedimentary rocks, has a soft appearance and a fine grain that is enriched with aggregate inserts and surface details. The integration of these two products results in **ALTER/EGO** – a sophisticated porcelain collection that fuses eras, styles and materials and brings abundant character and nuance to commercial and residential spaces.
