

FEZ by Wow Ceramics

A ceramic wall tile with abundant character and color variation

Named after the city in northern inland Morocco, **FEZ** is a ceramic wall tile series that captures the essence of the tile production methods practiced by Moorish artisans for centuries. The outcome of this process, commonly referred to as *zellige* tiles, is a product that's rich in color with wide variation and unique (i.e., imperfect) surface character. We stock **FEZ** in a 2-1/2 x 5 field size in five distinctive

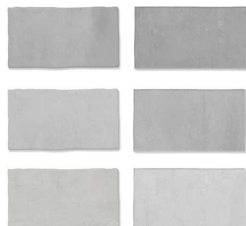

White Gloss

colors and two glaze finishes.

STOCKED FIELD SIZE:

- 2-1/2 x 5

ADDITIONAL INFO & PRODUCT CHARACTERISTICS:

Due to the special molds and unique production procedure used to create this collection, some tiles may contain small surface imperfections and/or tiny chips at the edges.

However, once installed and grouted, these imperfections will blend in giving the final result a look and feel very similar to the authentic artisan tiles created in the *zellige* tradition.

- Shade range = **V4** (substantial variation)
- Applications: Interior walls, shower walls, light duty countertops and residential bathroom floors (matte finish only)
- Recommended grout joint size: The field tile in this series contains dimensional variations from piece to piece — most with irregular edges. For this reason, we suggest using an 1/8" - 3/16" grout joint. ***THESE TILES ARE NOT INTENDED TO BE BUTT-JOINTED.***
- Additional colors and trim are available via special order out of Anaheim, CA. Allow 7 - 10 days for delivery.
