

EVOQUE by Verde 1999 **PORCELAIN TILE FOR FLOORS & WALLS**

The success of our “concrete look” from Flaviker’s Urban Concrete series inspired us to look for the next version of this tile. EVOQUE from Verde 1999 fits the bill with even more movement and detail as it replicates the look of a washed concrete.

EVOQUE gets its name from the French word “evoquer”, which means “to induce, stimulate, arouse, awaken, inspire or recall”. We are confident that this tile will do all of that, as its versatility has no limits. We are stocking four colors: Avorio, Carbon, Ecru and Grigio.

We think this contemporary tile will look particularly great in the largest format size (31.5x31.5). It will certainly accommodate any counter depth and its colored body will allow for a clean look when edges are buffed out.

Sizes:

- 12 x 24 Rectified
- 31.5 x 31.5 Rectified
